

CODE WAVE AI

Modern Web Applications with AI Chatbot Integration

Project Overview

Code Wave AI is a premium technology brand platform built with React 19, TypeScript, and Supabase. It features role-based authentication with password recovery, an admin dashboard with analytics, a public project showcase with user interactions and per-project FAQs, AI voice chatbot integration, and a fully responsive dark/light mode UI. Deployed with Docker and Nginx for production-ready performance.

Tech Stack

Frontend: React 19 + TypeScript

Styling: Tailwind CSS 3.4

Backend: Supabase (Auth + PostgreSQL)

Build Tool: Vite 6

AI Feature: Voice Chatbot Integration

Deployment: Docker + Nginx

Key Features

✓ AI Voice Chatbot Integration

✓ Role-Based Auth & Password Recovery

✓ Admin Dashboard & Analytics

✓ Project Showcase with Likes, Ratings & FAQs

✓ Dark / Light Mode

✓ Fully Responsive Design

✓ Contact Form with Geolocation

✓ Team Management System

✓ Visitor Tracking & Site Analytics

✓ Secure Database with RLS Policies

✓ Docker Containerized Deployment

✓ Per-Project FAQ Management

My Work Process

1

Requirement

Understand your project goals, features, and design preferences

2

Design

Create UI layout with responsive design and branding

3

Development

Build frontend, backend, chatbot, and authentication

4

Testing

Test across devices, fix bugs, and optimize performance

5

Delivery

Deploy, hand over source code, and provide support

Why Choose Me

Clean Code

Well-structured, maintainable, and scalable codebase

Fast Delivery

On-time delivery with regular progress updates

Secure Backend

Authentication and database security with RLS policies

Responsive Design

Pixel-perfect UI on mobile, tablet, and desktop

Frequently Asked Questions

Q: What tech stack do you use?

React 19, TypeScript, Tailwind CSS, Supabase, and Vite for fast, modern web apps.

Q: Can you integrate an AI chatbot?

Yes, I build custom AI voice chatbots that interact with users in real-time.

Q: Do you provide the source code?

Yes, full source code is included in every package.

Q: Will the website be mobile responsive?

Yes, every project is fully responsive across all devices.

Q: Can you add FAQs to each project page?

Yes, admins can add dynamic FAQ entries per project with an accordion display on the detail page.

Q: Do you offer post-delivery support?

Yes, I provide free bug fixes for 7 days after delivery.

Ready to Build Your Project?

Send me your project details and let's create something amazing together.

Fast response • On-time delivery • 100% satisfaction
